

About Business Resiliency Services

The world is **riskier** than it used to be and **business disruptions** are happening **more frequently**

The recent global cyberattacks are a clear and present reminder of the critical importance of a proactive, integrated plan for cyber-resiliency. IBM delivers business continuity and disaster recovery services that support your business across all environments — public cloud, private cloud and on-premises, traditional data center environments.

Session #8040

Ready for Anything: Build a Cyber Resilient Organization

Tue, 20-Mar 12:30 PM - 01:00 PM

Mandalay Bay South, Level 2
Keynote Theater, Mandalay Bay Ballroom

With ongoing disruption and outages from cyberattacks, human error, and natural disasters, organizations must shorten response and recovery time, protect their data and devices, and address/bridge the enormous skills gap required to stop cyberattacks and disruptions. While it feels like we are at a moment of crisis, IBM Security General Manager Marc van Zadelhoff and IBM North American Vice President of Global Resiliency Services Mike Errity are confident that we can win this asymmetrical battle with three main steps: Mastering security and resiliency fundamentals, using artificial intelligence to change the game and being prepared.

Meet with an IBM Business Resiliency Services executive

Featured Executive:

Chandra Pulamarasessti
VP, Resiliency Strategy & Resiliency Orchestration Software and Services

Chandra currently, has dual responsibility of leading the Global Strategy for the IBM GTS Resiliency Services and handles the Resiliency Orchestration Software and Services business.
